

TechMart Electronics - SmartPlug V2 Installation Guide

Step 1: Powering On the Device

Plug the TechMart SmartPlug V2 into a wall power outlet. The LED indicator on the side will begin flashing green, indicating that it is in setup pairing mode.

Step 2: Network Preparation

Ensure your mobile smartphone is connected to a 2.4GHz WiFi wireless band. Note: The SmartPlug does not support 5GHz network configurations.

Step 3: Application Setup

Download and log into the TechMart Smart Home App. Tap the '+' icon in the top right corner, select 'SmartPlug V2' from the list, and input your local WiFi network credentials.

Step 4: Pairing Execution

Wait 30 seconds for the indicator light to solid-green lock. Once connected, name the smart plug in the app to enable Google Assistant or Amazon Alexa voice controls.
